PROFESSIONAL EXPERIENCE

Data & Reporting Specialist

02/2026 – Present

Master Care, LLC – Sacramento, CA

- Records & Reporting Support: Validate and reconcile member-level data for CalAIM reporting, ensuring accurate records, clean files, and compliance with reporting requirements.
- Confidential Data Handling: Retrieve, process, and organize secure files through SFTP, including encrypted files, structured reporting outputs, and payer-specific submission files.
- Data Validation & Quality Review: Utilize advanced Excel functions, reporting logic, and validation techniques to identify discrepancies, improve file accuracy, and support successful monthly submissions.
- Team & Stakeholder Support: Provide reporting updates, clarify data issues, and coordinate with internal teams and leadership to meet regulatory and operational deadlines.
- Reporting Documentation & Process Improvement: Maintain reporting logic, mapping documentation, validation procedures, and audit-ready working files to support repeatable, scalable, and traceable reporting processes.
- Reporting Modernization & AI Workflow Innovation: Support reporting modernization initiatives through process analysis, workflow documentation, validation planning, and evaluation of AI-assisted approaches designed to improve reporting accuracy, operational efficiency, and analyst productivity.

Sales Associate

10/2025 – 01/2026

Macy's – Sacramento, CA

- Provided efficient, accurate customer service while handling high-volume requests, resolving issues, and following documented procedures.
- Maintained clean, compliant point-of-sale records and ensured precise entry of transactions, returns, and adjustments.
- Supported daily store operations through organized task tracking, inventory coordination, and adherence to documented procedures.

Business Data Analyst

06/2023 – 11/2024

Intel Corporation – Sacramento, CA

- Led CRM and internal system enhancements across Business Analyst, Product Owner, and QA roles, translating business needs into clear requirements, user stories, and acceptance criteria.
- Directed data governance and automation initiatives, improving reporting accuracy by 30% and increasing team productivity by 25%.
- Built and maintained Power BI dashboards and SQL pipelines supporting executive KPIs and operational reporting.
- Coordinated UAT and release readiness activities to ensure system changes met business and compliance requirements.
- Collaborated with technical and non-technical stakeholders to align priorities, resolve issues, and support timely delivery.

GPU Validation Engineer

04/2017 – 06/2023

Intel Corporation – Sacramento, CA

- Designed and executed validation strategies for DirectX graphics drivers across multiple hardware platforms to ensure performance, stability, and launch readiness.
- Collaborated with engineering and program teams to reduce delivery risks and improve platform reliability.

- Developed Python-based automation, reducing manual testing effort by 40% and accelerating validation cycles.
- Integrated validation processes into CI/CD pipelines to improve testing consistency and documentation.
- Analyzed defects and root causes, contributing to a 35% reduction in post-release issues.

QA Test Analyst Lead

07/2014 – 03/2017

NextGen Information Services Inc. (Client: NJVC LLC) – St. Louis, MO

- Led QA strategy, test planning, execution, and production support for a .NET-based enterprise application supporting government operations.
- Reduced defect leakage by 30% and improved sprint testing efficiency by 40%.
- Coordinated functional, regression, and system testing across multiple environments.
- Mentored team members, improving onboarding efficiency and overall team performance.
- Partnered with developers, analysts, and stakeholders to support continuous improvement.
